

QuickBooks Enterprise

Short overview

The QuickBooks Enterprise system enables small and medium business owners to manage their operations more efficiently. All finance, payroll, inventory, sales and purchase data can be stored in one place. Analyzing, searching and reporting on this data are intuitive and straightforward, making Enterprise a flexible yet comprehensive system.

QuickBooks Enterprise is ideal for organizations with more complex management needs including inventory intensive workflows, large number of daily transactions and multiple users or locations. Companies that are currently using Quickbooks Pro or Premier but require more customization or volume will find switching to Enterprise, a surprisingly smooth and cost-effective process.

Quickbooks Enterprise can be tailored to different industries based on the business model – contractor, manufacturing and wholesale, nonprofit or retail. This feature, combined with its ability to grow with the business, makes it a sophisticated and powerful financial management software.

Functionality list

- 14 predefined user roles that limit data access between different departments –e.g. accounting and sales.
- Scalable from 5 to 30 users
- Smart search functionality that auto completes search terms. Particularly useful for fields like account numbers.
- Automated reporting that generates reports on a fixed schedule.
- Combine reporting from multiple company files to gain new insights.
- Store all historical data with increased capacity and improved processing.
- Advanced inventory and pricing add-ons for better control, customization and automation.
- Anywhere, anytime access with optional monthly cloud hosting services.

Pricing

Quickbooks Enterprise comes in the Silver, Gold and Platinum pricing packages. Silver has the bare minimum necessary to get started, while Gold is the most popular with additional functionality around tax filing and employee payroll management. Platinum has the full range of customization, especially the features based on industry type. Prices below are for annual subscriptions, billed monthly.

Hosting	Users	Silver	Gold	Platinum
No	5	\$234	\$259	\$284
Yes	5	\$453.99	\$478.99	\$503.99
No	30	\$525	\$550	\$575

Yes	10	\$798.97	\$823.97	\$848.97
-----	----	----------	----------	----------

System requirements

Quickbooks Enterprise can be run on a single, stand alone system with the following requirements:

- Windows Vista, 7 SP1, 8.1 Update 1, or Windows 10(32-bit & 64-bit)
- Windows Server 2008 R2 SP1, 2012 R2
- 2.4 GHz processor
- 4 GB of RAM
- 2.5 GB disk space recommended (additional space required for data files)
- 1024x768 or higher screen resolution, extended monitor is supported
- 4x DVD-ROM drive
- Payroll and online features require Internet access (1 Mbps recommended speed)
- Product registration required

Cloud hosting is available at additional cost, as mentioned in the table above.
